

RIDGE

Picture a seamless illuminated band stretching across the span of a bridge; its even, powerful, punchy white glow is a sign of unwavering reliability. Rain lashes down, and winds howl, yet its luminosity remains steadfast for this architectural marvel.

It's the way we design lighting that embodies our values. Highly engineered, high-performance LEDs tailored for linear lighting applications and a dedicated mounting system, Ridge gives lighting designers a wide range of application options. With an innovative and easy connectivity system that fits today's lighting needs, Ridge strikes a balance of practicality, flexibility, and performance.

RIDGE

Iconic to the Core

IT'S IN THE
DETAILS

Tower: SAF28, SAF14, SAF7, SAF1 SW 4000K

Main Girder: Ridge U4 90CRI 40K 40x60DEG

THAT BUILDS LANDMARKS

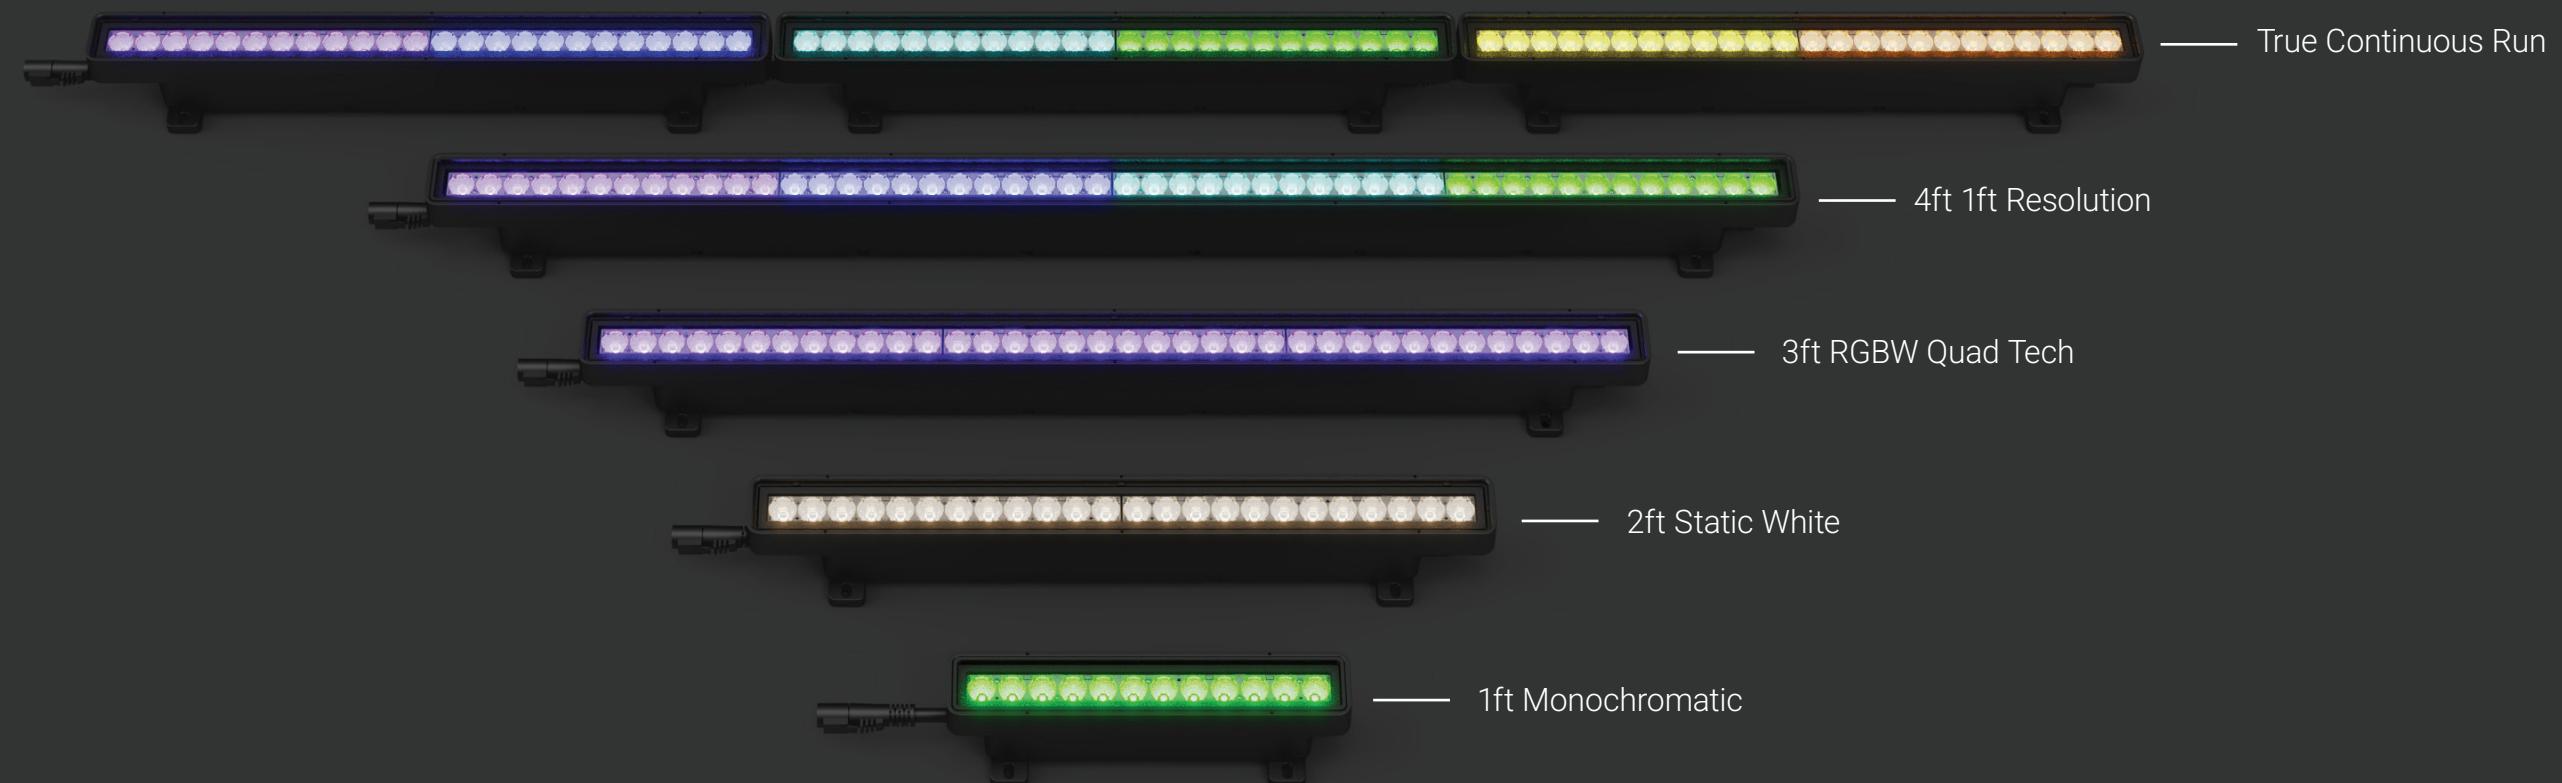

Tower: SAF28, SAF14, SAF7, SAF1 RGBW4

Main Girder: Ridge U4 90CRI RGBW4 40x60DEG

ICONIC TO THE CORE

Ridge is conceived as a design-forward solution for today's environment. Its low-profile linear form integrates seamlessly into façades and architecture, delivering precise illumination without visual clutter. By harmonizing advanced optics with human-centric lighting principles, Ridge elevates spaces with light that is both functional and expressive.

GREAT DESIGN IS TRANSPARENT

MORE POWER: 2100 lm/ft and up to 24 W/ft

HIGHER SATURATON: RGBW Quad Tech, tailored high-clarity acrylic optics, and more LED clusters

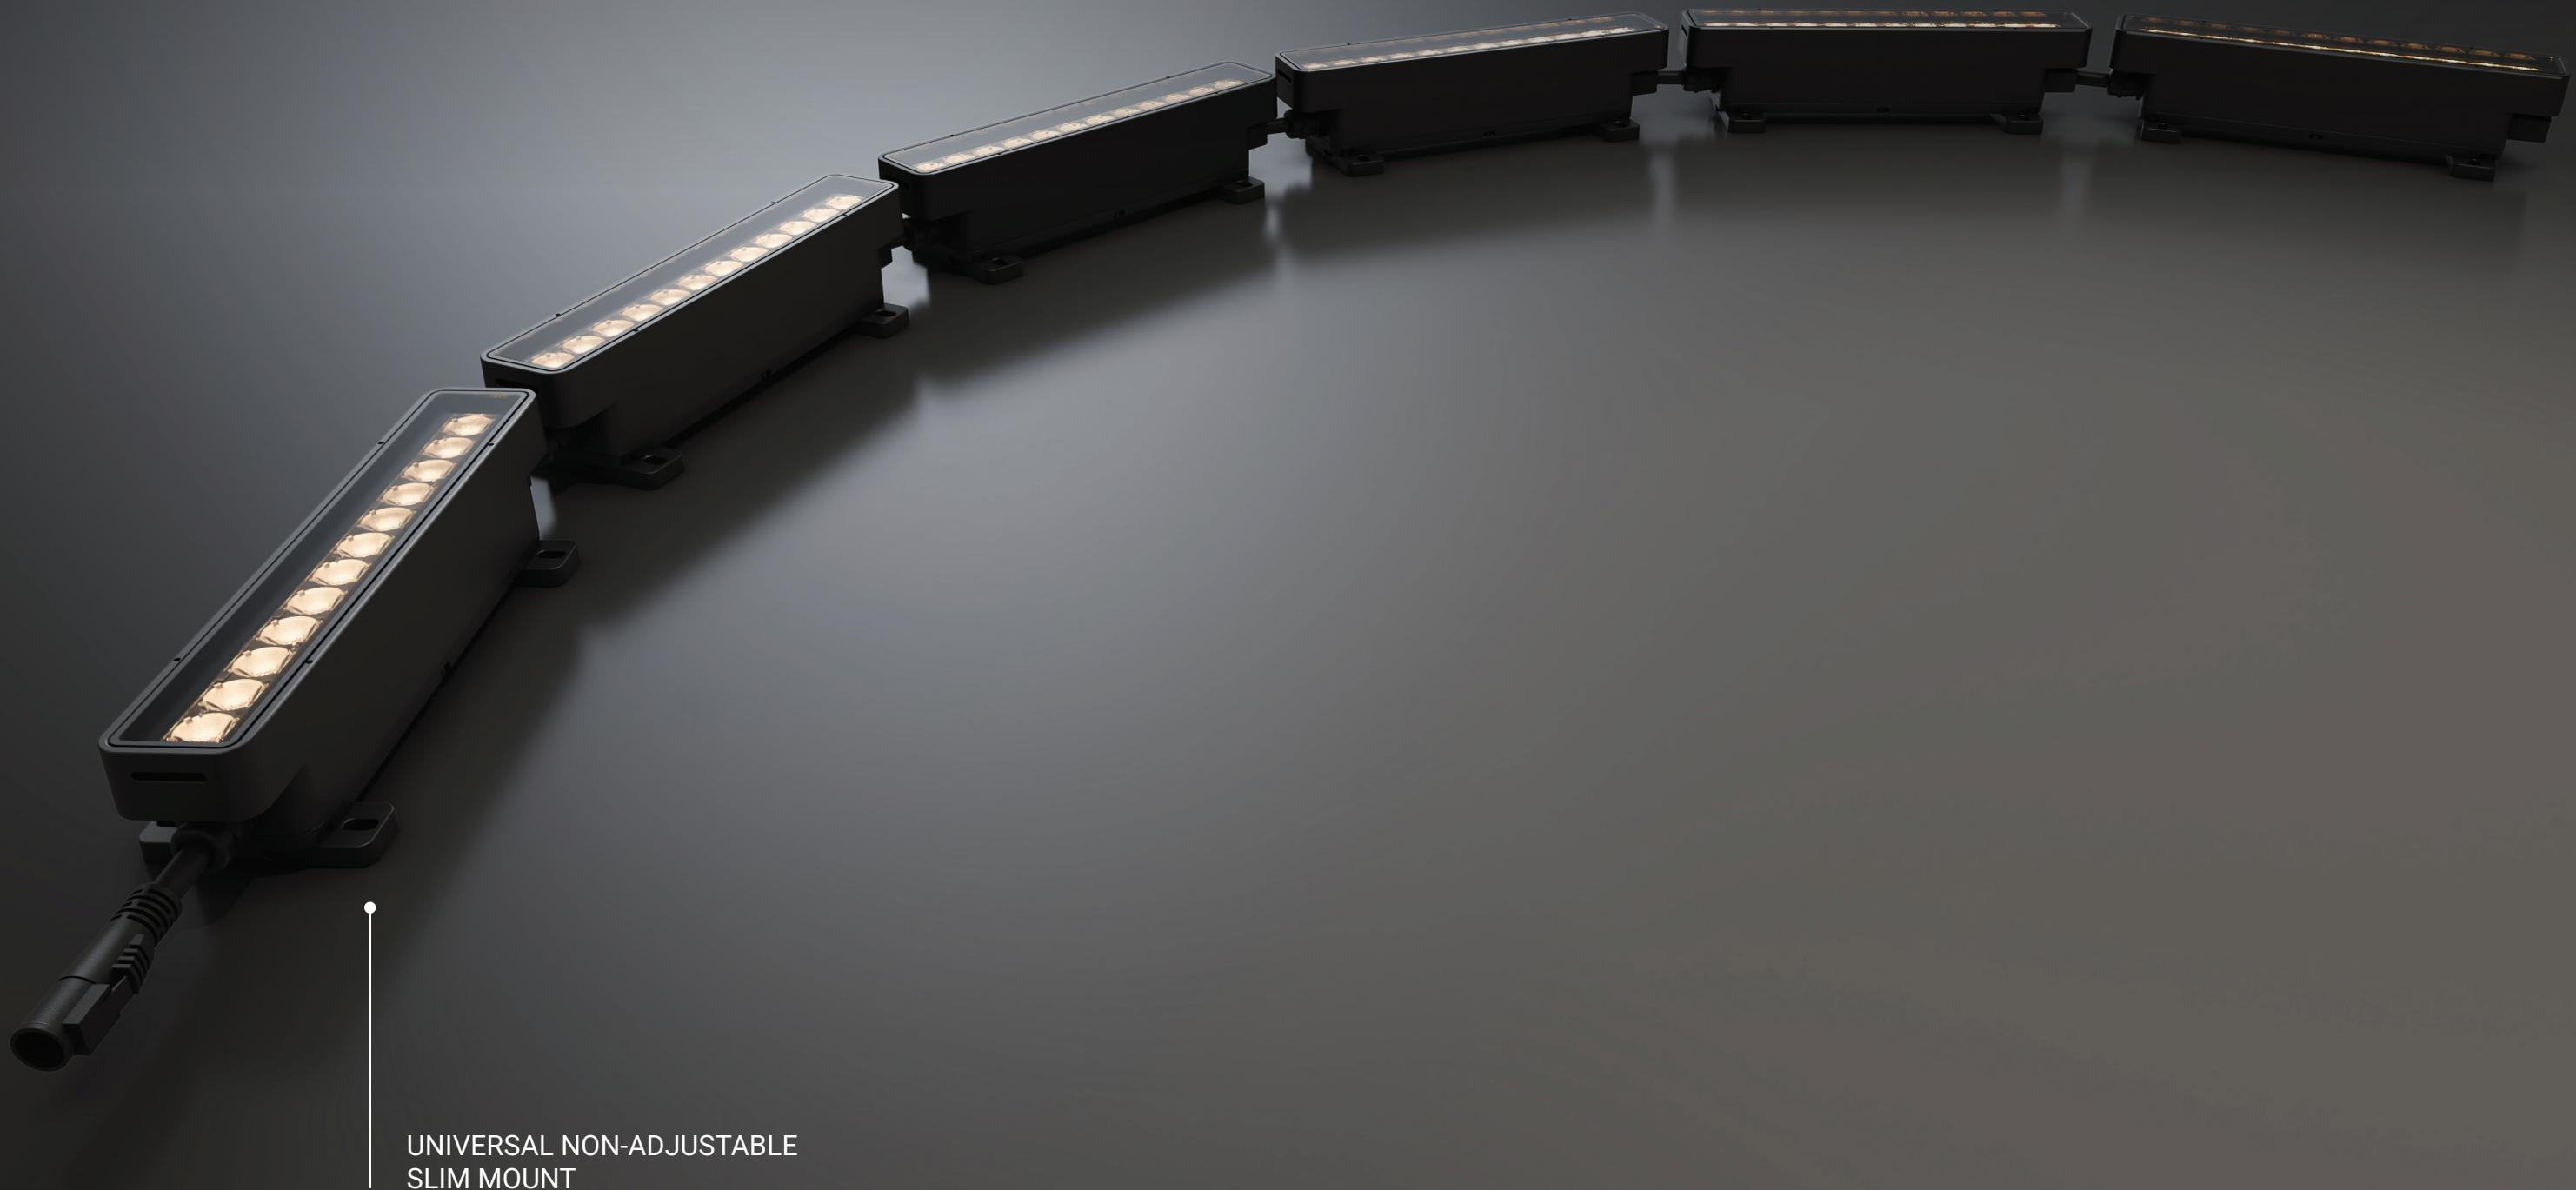

WATERPROOF: Features a robust die-cast aluminum construction with a permanently bonded silicone seal creating an impermeable barrier against water.

ROBUST: 3G, 5G, IK10, IP67, BAA, BABA

WINDING CURVES

- 1-foot nominal length
- Tight or constrained spaces
- Complex and non-linear layouts

PERFECTED ILLUMINATION

NO COMPROMISES

Ridge empowers designers with flexibility and control. RGBW Quad Tech unlocks a full spectrum of color, while the Power Scaling driver maintains saturation without sacrificing lumen output. Proprietary linear LEDs deliver crisp whites and uniform distribution, enabling precise light modeling across architectural surfaces. Ridge is more than a luminaire—it's a tool for shaping visual identity through light.

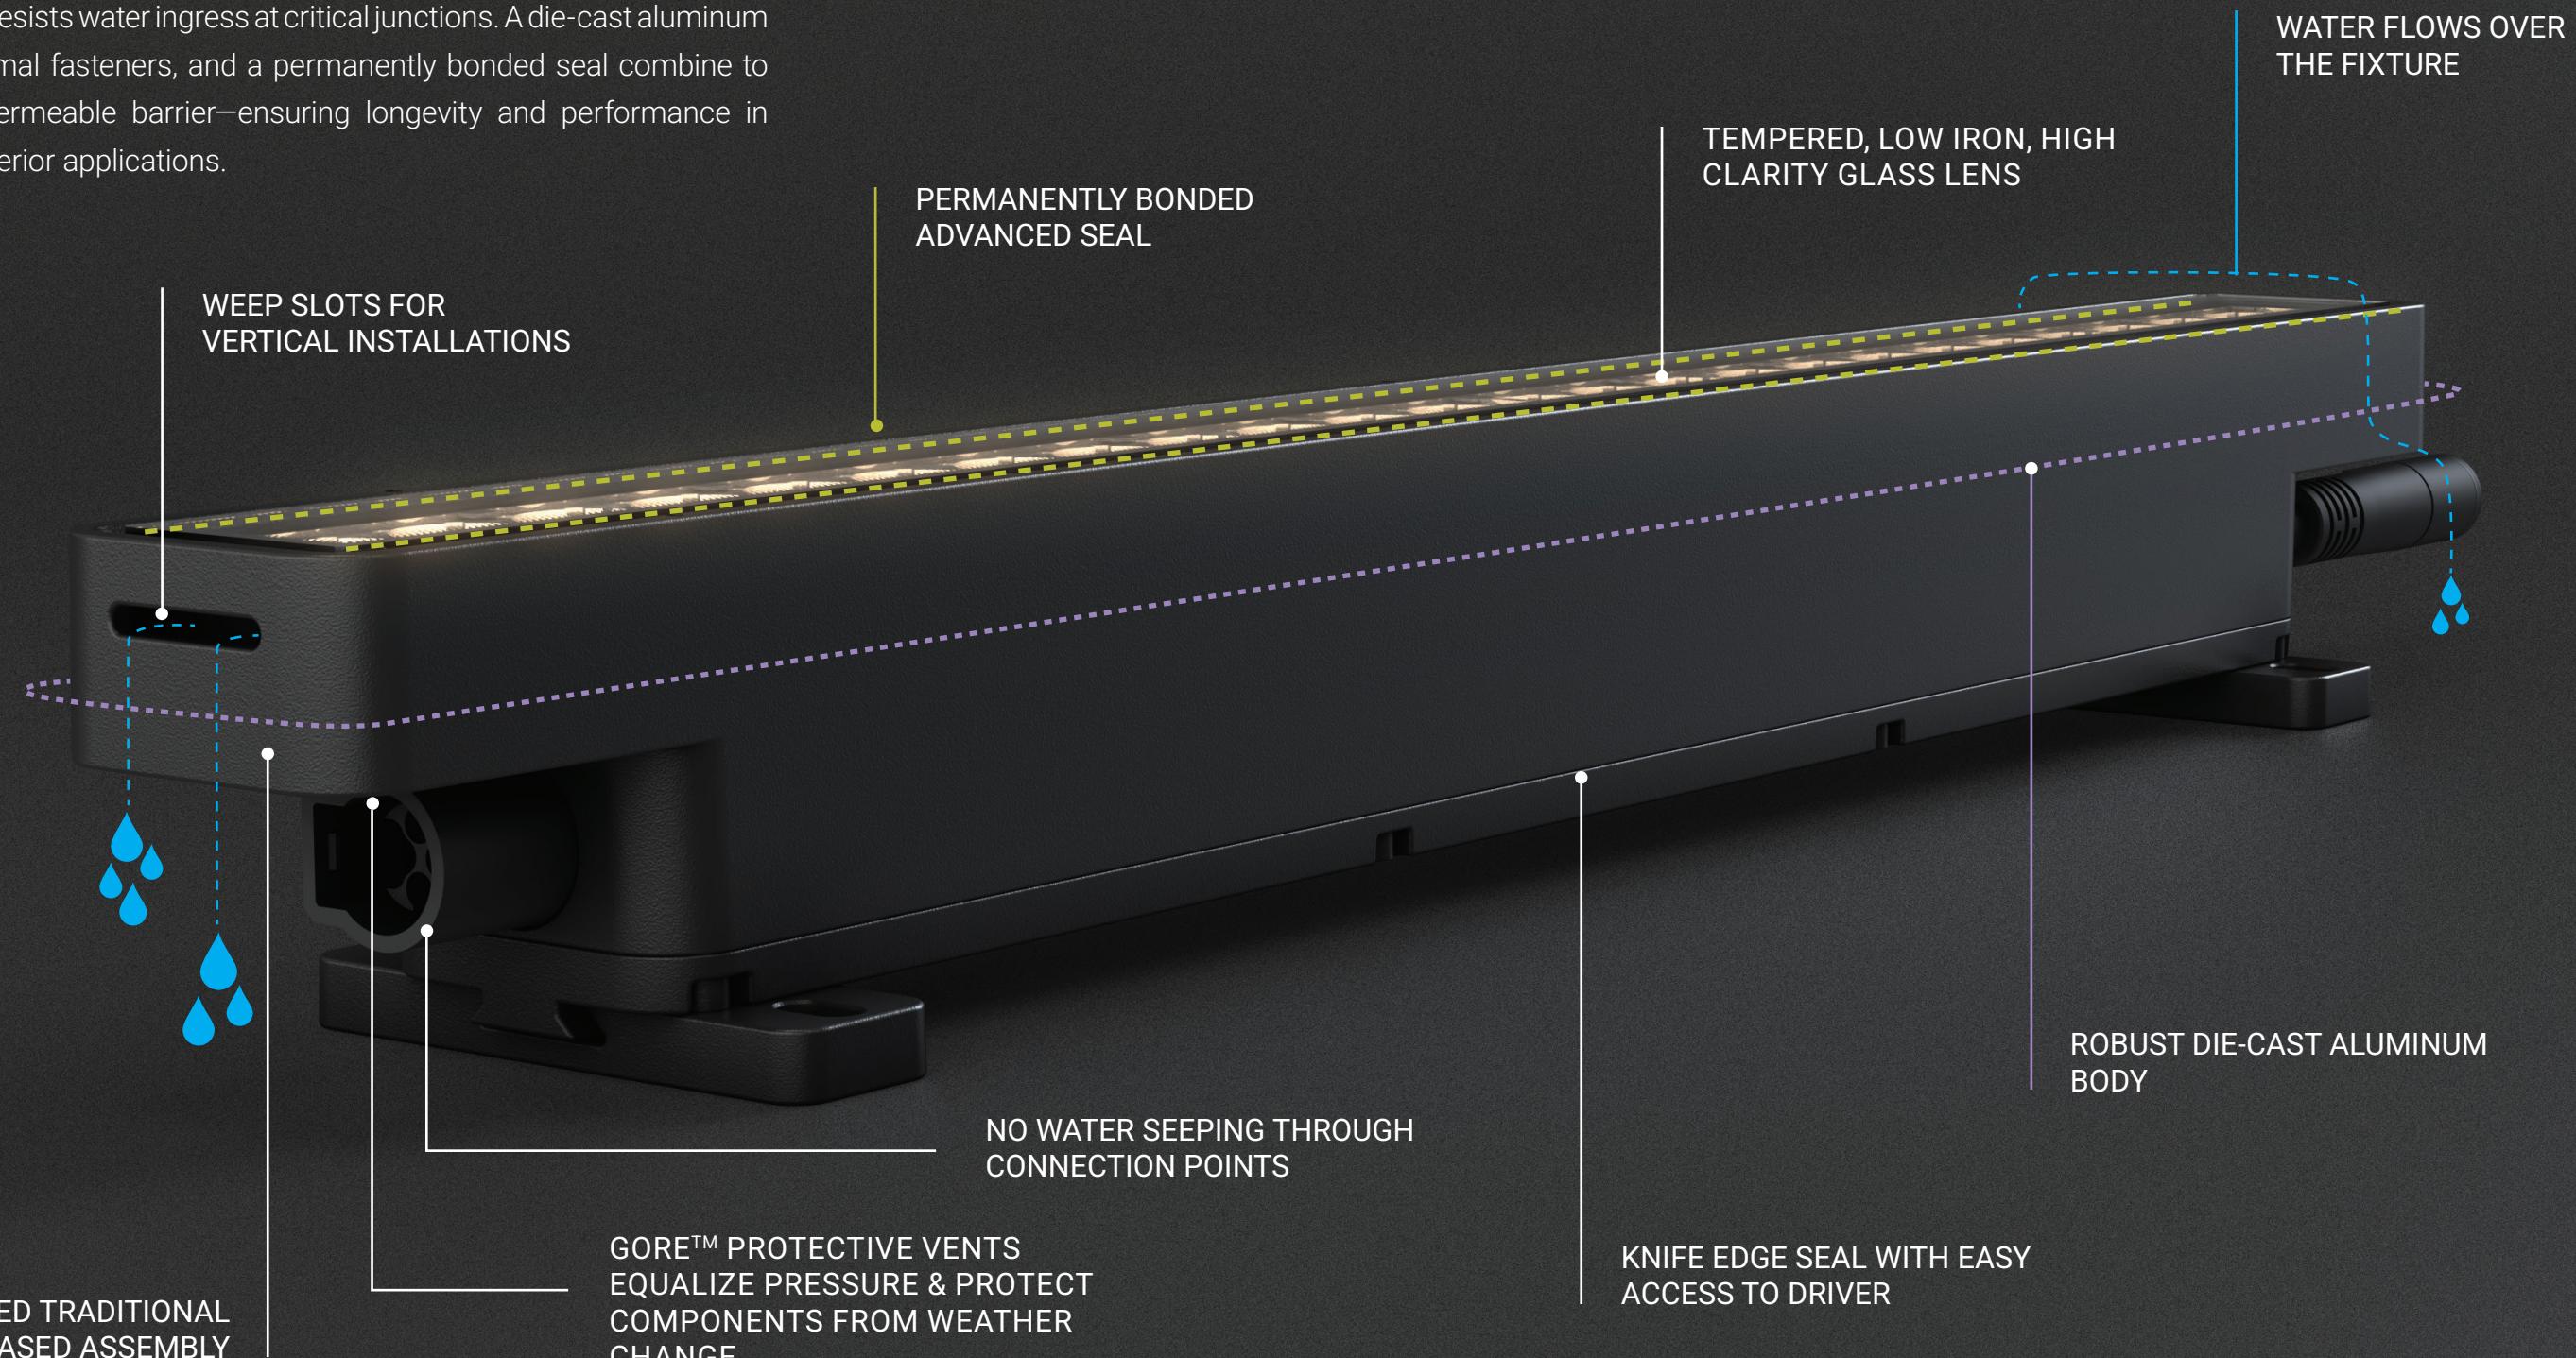

EASY UPDATES

- Update driver by removing base plate
- Mount stays in place
- No need to pull out the gasket
- Easier replacement of the driver without disturbing other components or compromising the fixture's integrity

TOP-DOWN DESIGN

Every detail of Ridge speaks to architectural integrity. The housing eliminates conventional screw-based assemblies, resulting in a clean, uninterrupted geometry that resists water ingress at critical junctions. A die-cast aluminum structure, minimal fasteners, and a permanently bonded seal combine to create an impermeable barrier—ensuring longevity and performance in demanding exterior applications.

MOUNTING POSSIBILITIES

With 18 mounting options that are exclusive to Ridge, the linear family fulfils the many demands for linear lighting applications. A unique pivot and slide feature ensures a near-perfect lighting location. Easy cabling system, improved installation flexibility, and field-adjustable mounting options with the Taper-Lock mechanism significantly enhance Ridge's versatility. 3G and 5G vibration rated option also included!

FREEDOM OF CHOICE

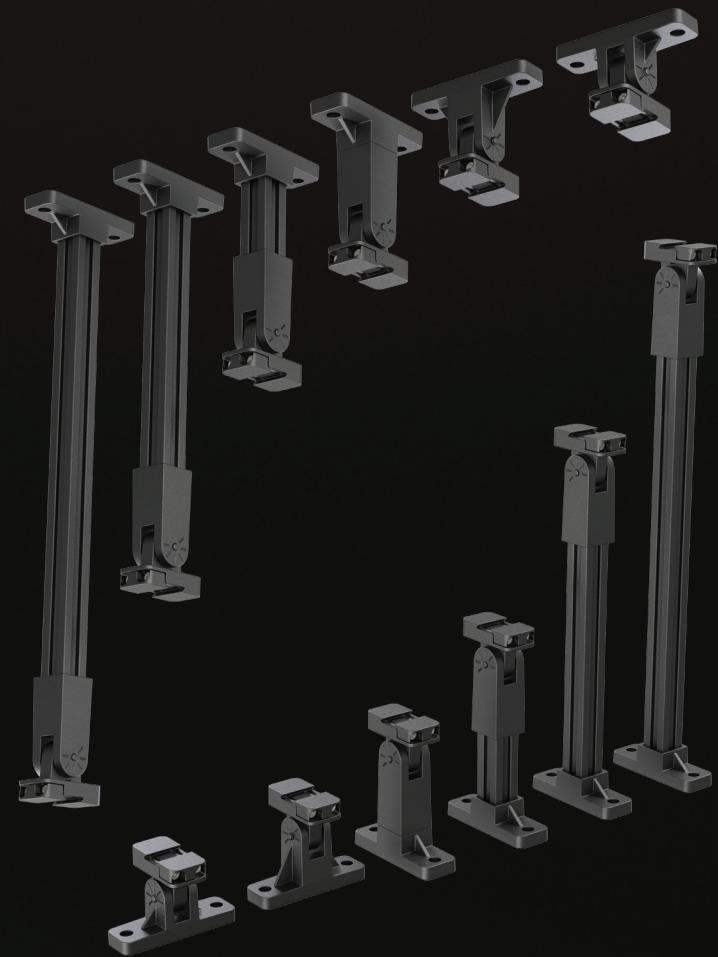

VERTICAL ADJUSTABLE

The vertical mount minimizes its visual impact whether looking above or below the fixture. It offers an impressive tilt range, only limited by the fixture or the surface. 5G vibration-rated options are available with the 1" and 2" mounts.

HORIZONTAL ADJUSTABLE

Maintains balance throughout the 180-degree tilt range involves a unique slide and pivot mechanism that keeps the luminaire's weight centered over the Horizontal mount. Applicable with upward or downward facing applications. 5G vibration-rated options are available with the 1" and 2" mounts.

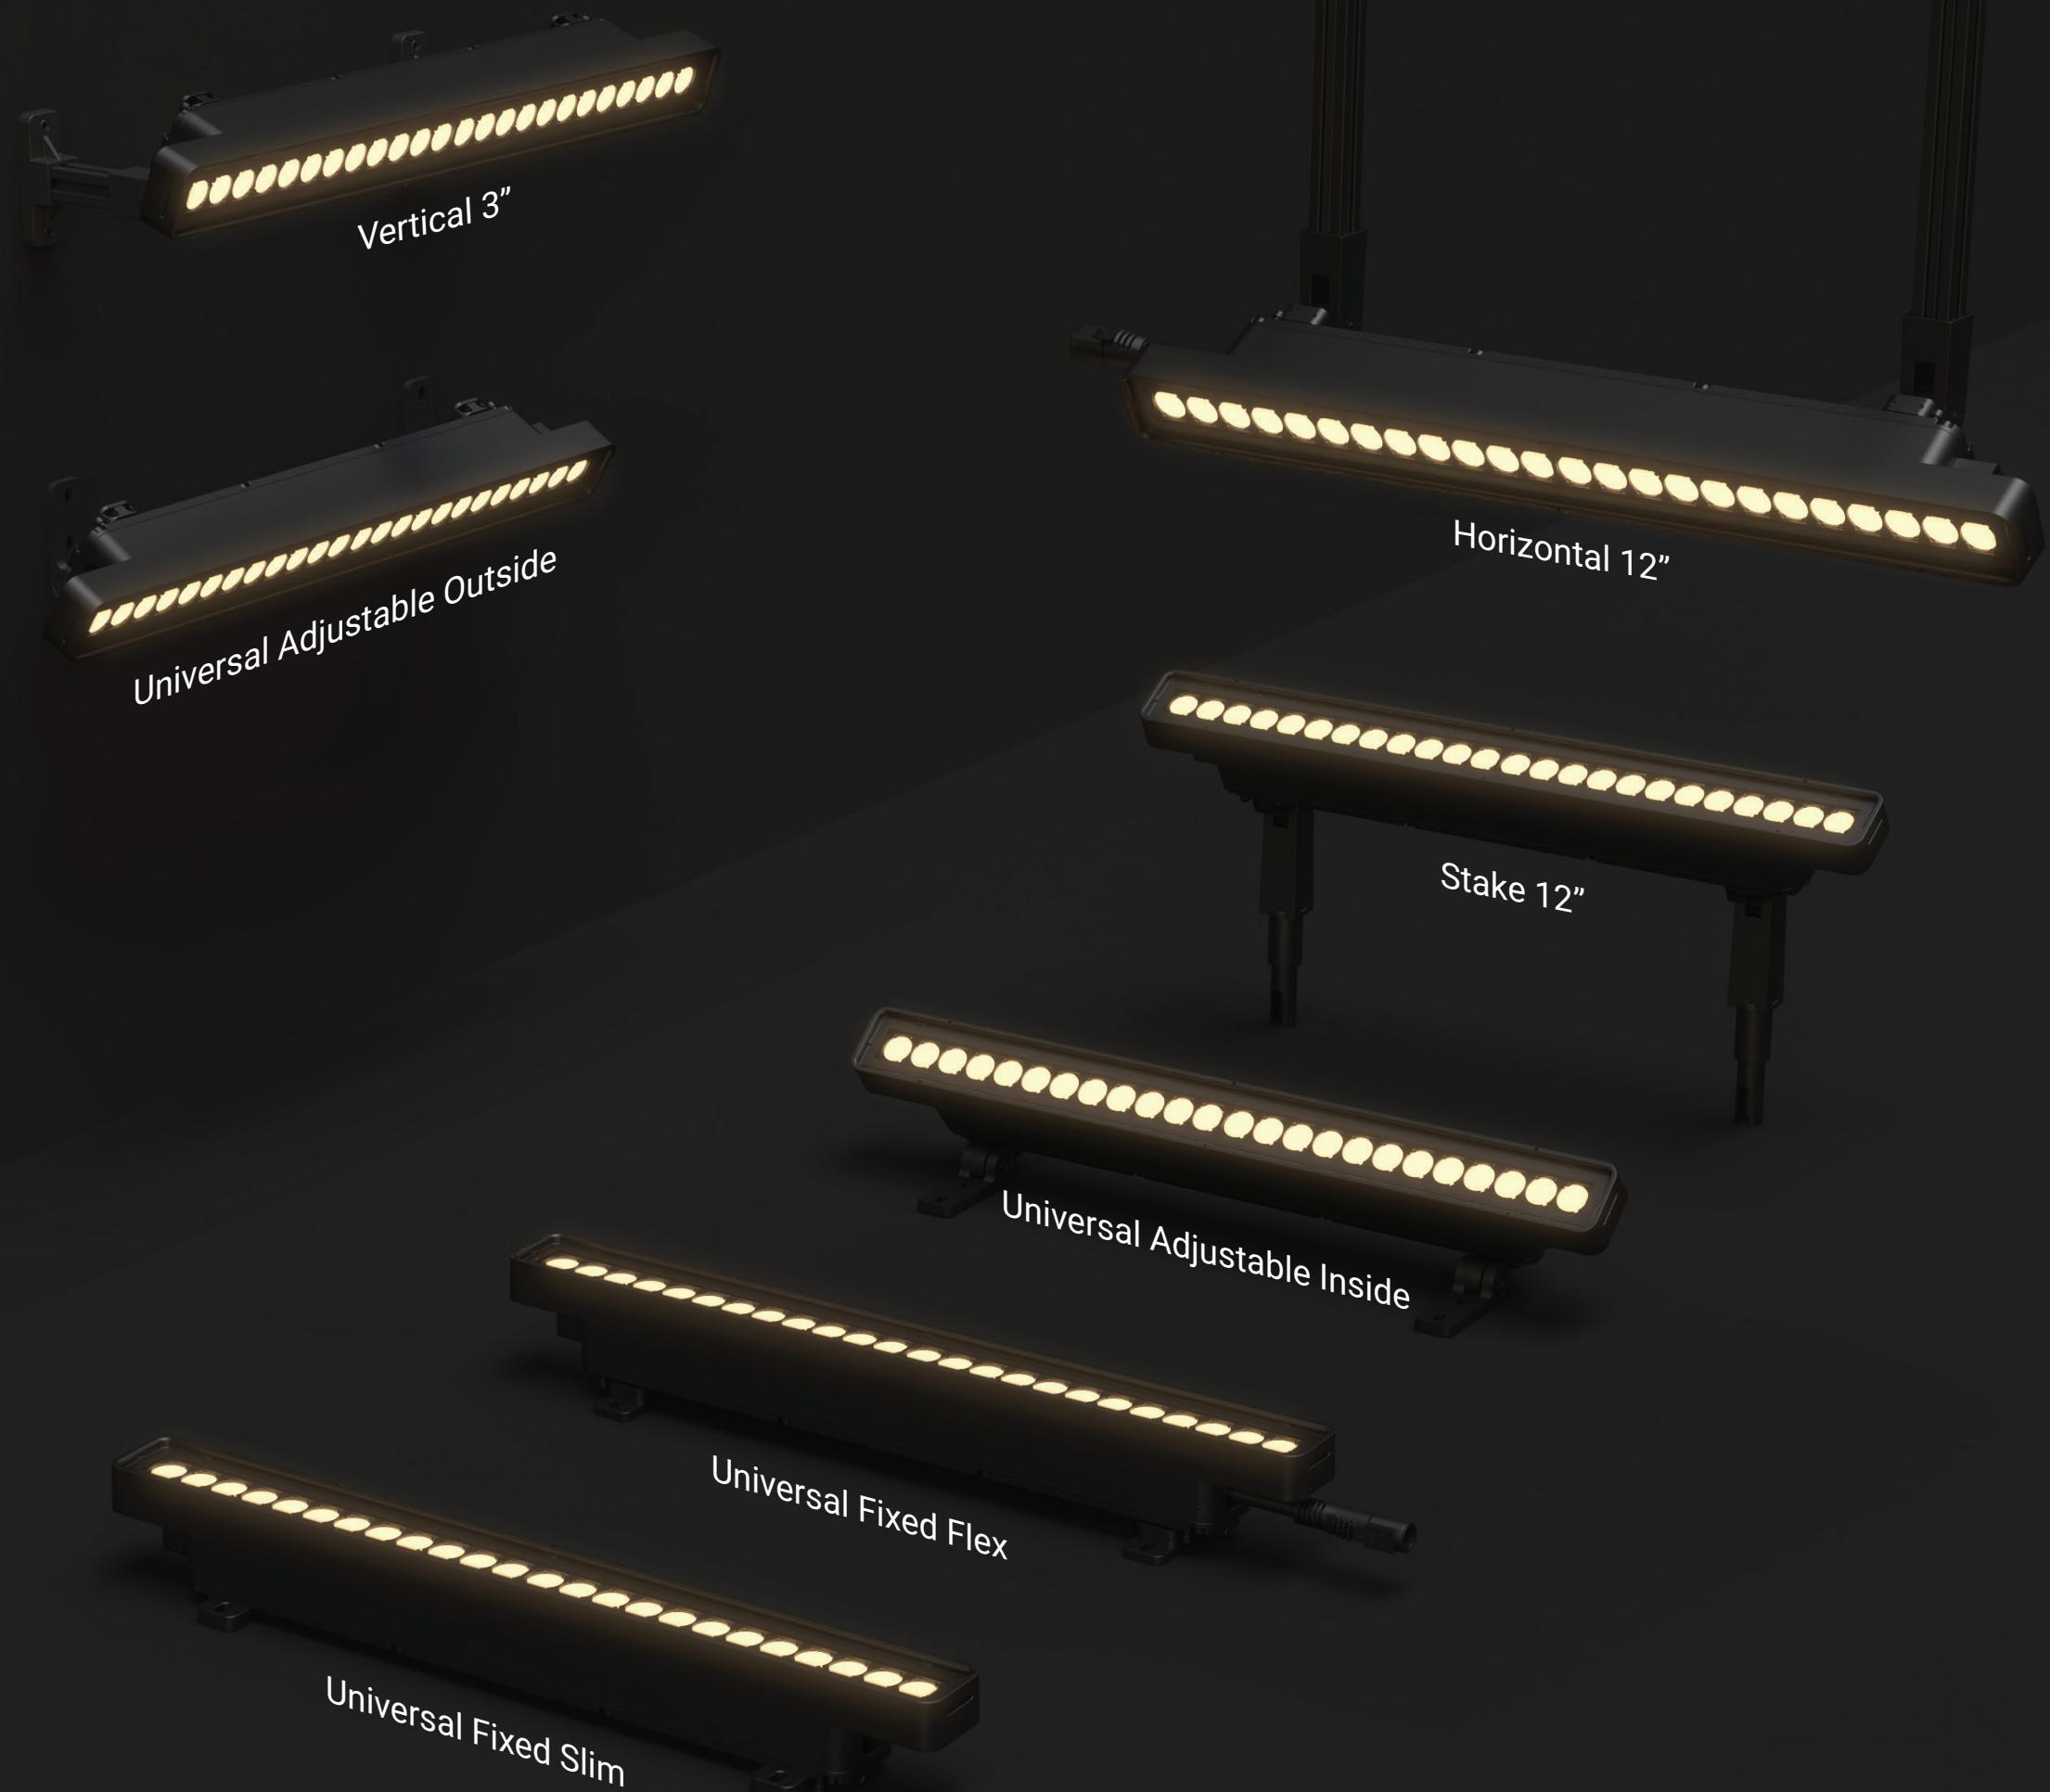

STAKE | GROUND

Maintains balance throughout the 180-degree tilt range with a slide and pivot mechanism that keeps the luminaire's weight centered. Applicable for ground applications.

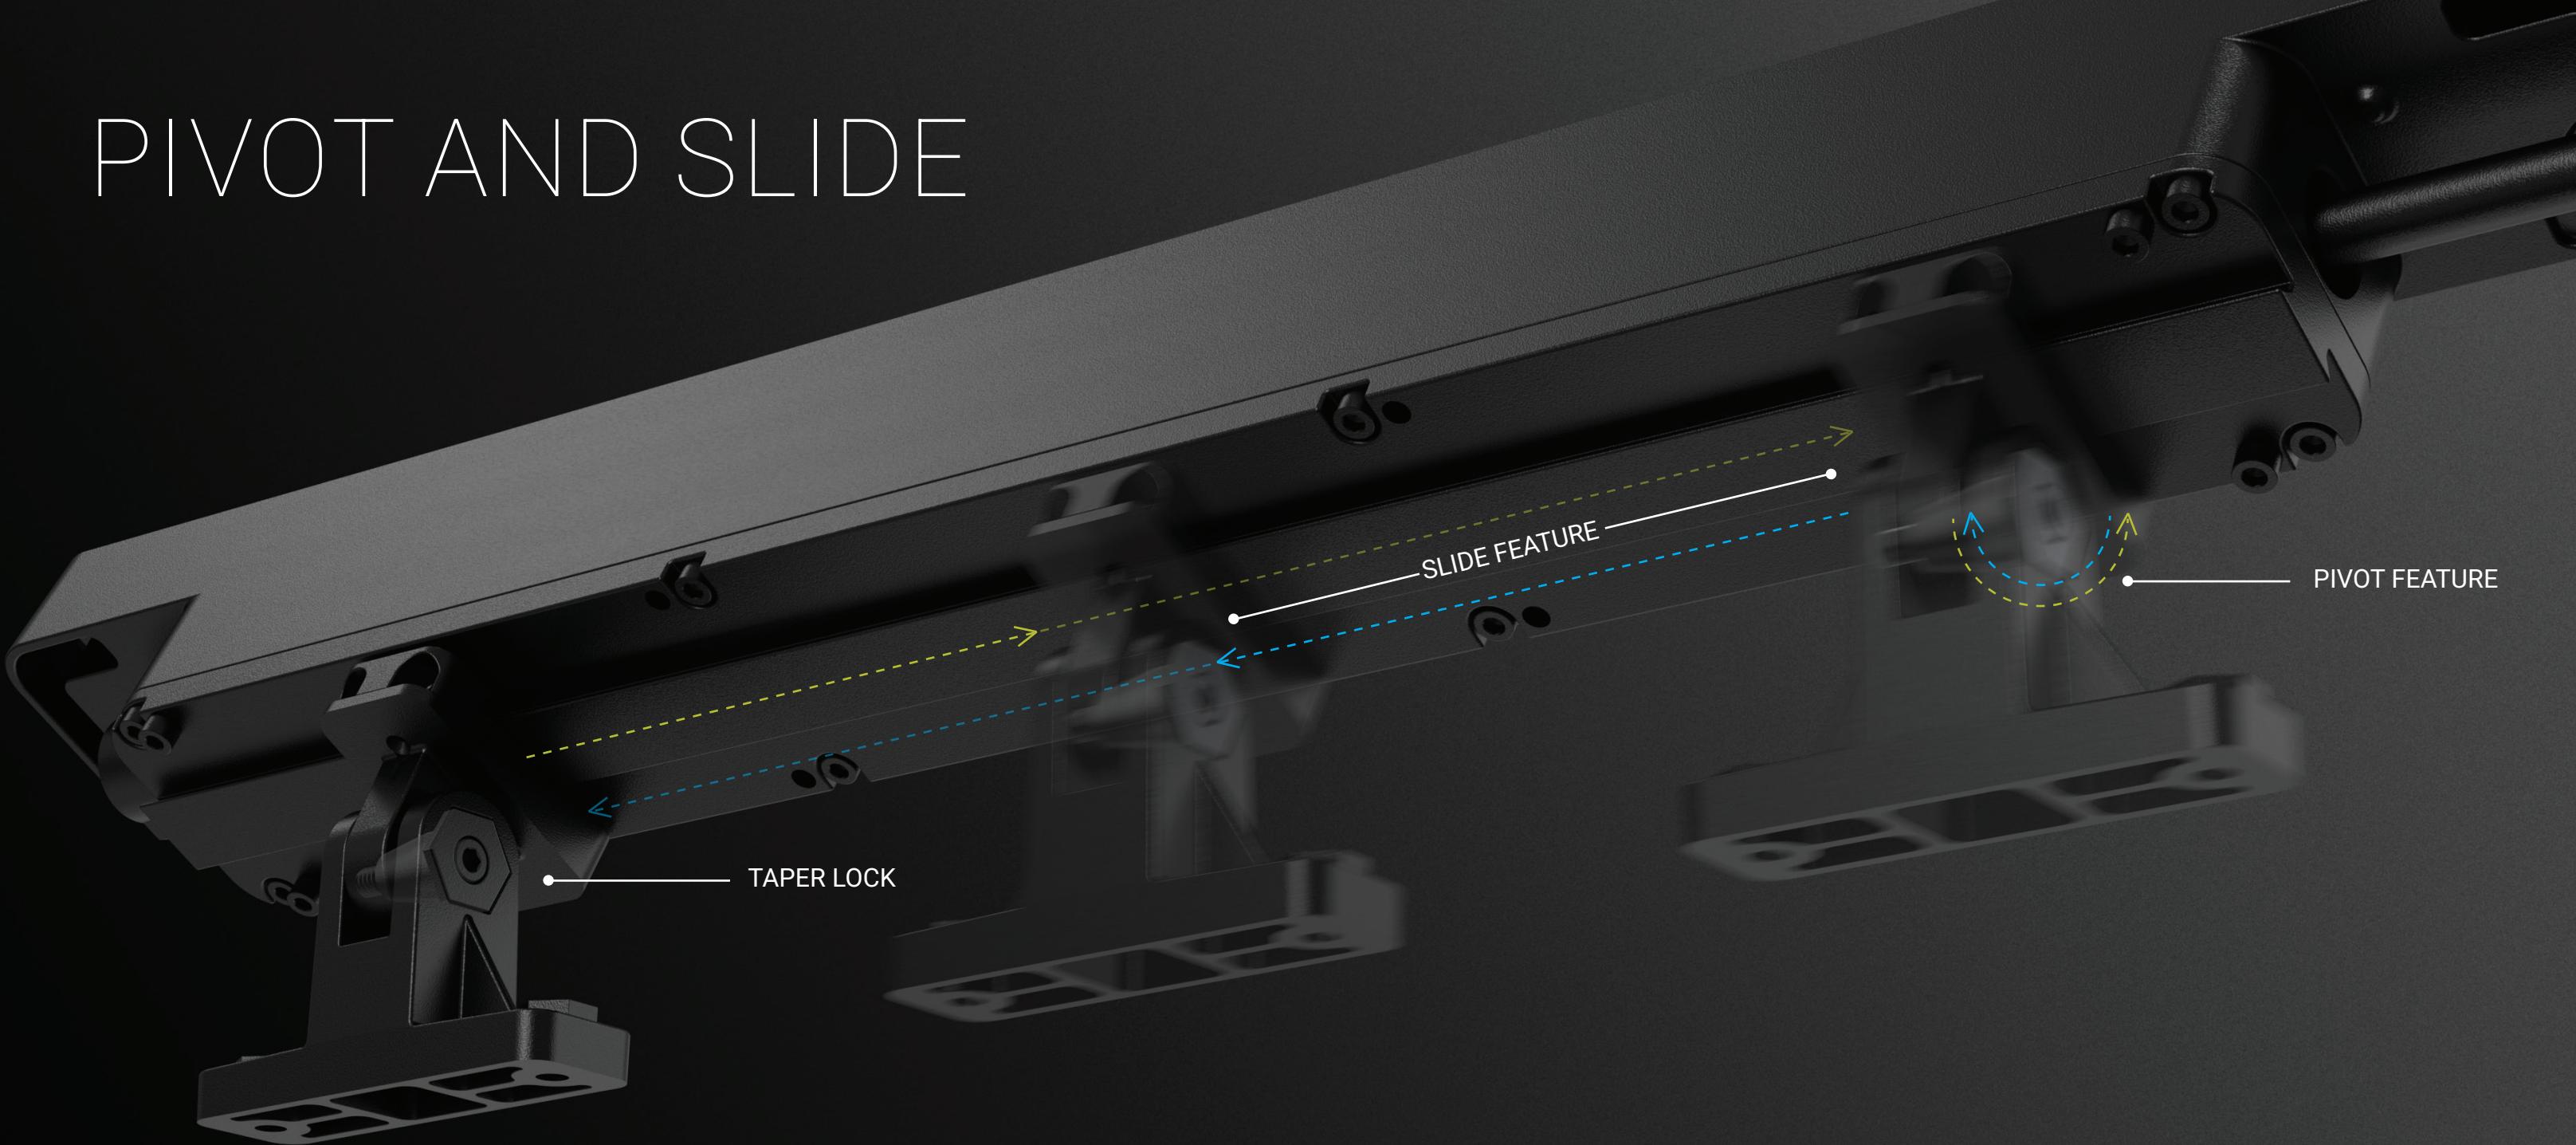

UNIVERSAL

A form-fitting mount with a fixed or adjustable arm and compatible with horizontal and vertical surfaces. Versatile, ease of installation and a 3G or 5G vibration-rated options are available.

A CLOSER LOOK

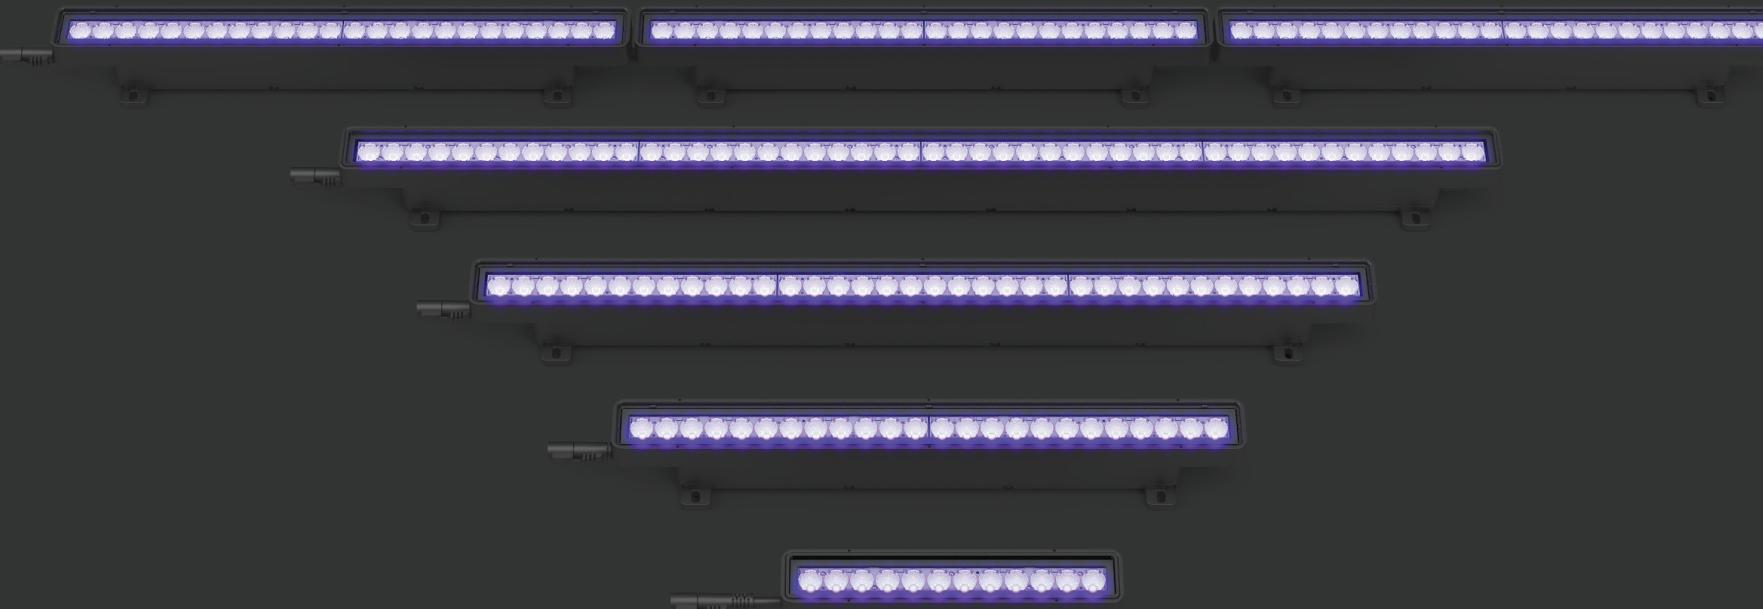

PIVOT AND SLIDE

INFINITE COLOR SELECTION

RGBW Quad Tech utilizes advanced optical color mixing to eliminate striations and color separation, ensuring seamless, vibrant illumination. Designed with the Power Scaling driver to ensure each channel achieves maximum wattage and output, resulting in a highly efficient luminaire that offers maximum performance and brightness.

- 1ft, 2ft, 3ft, 4ft nominal lengths
- Optional 1FT resolution control
- No color separation or loss of lumen output
- No overheating of fixture
- Precise color matching
- Prevents striations and color separation in wall grazing or wall-washing applications
- Up to 6,400 delivered lumens, 1,700 lm/ft & 110,600 CBCP

DETAILED APPLICATIONS

The Ridge linear floodlight family provides precise resolution control down to just 1 foot, enabling highly detailed and accurate lighting design for outdoor applications. Its advanced optics and control technology allow users to customize light distribution and focus with exceptional precision when details matter. The Ridge family's versatile features ensure that every project achieves optimal visual impact with unmatched control and flexibility.

- Intricate lighting effects
- Dynamic color changes
- Precise spatial lighting design

SMART AUTOMATION

Ridge is compatible with a wide range of industry-standard control protocols—including 0-10V, Phase Dimming, DMX, and DALI—enabling dynamic lighting effects, granular fixture control, and improved energy efficiency.

- Supports complexity, scalability and integration needs
- Greater integration flexibility for diverse project needs
- Enhanced customization and dynamic lighting effects
- Improved energy management and operational efficiency

PRECISION MEETS CONTROL

Ridge's versatile linear floodlights—available in RGBW, static white, monochromatic colors, and with 1ft resolution—are fully compatible with the Animate™ Controller by nLight®.

This integration empowers designers to deliver both practical and outdoor, expressive outdoor lighting environments, combining energy optimization, code compliance, and enhanced occupant comfort with the creative flexibility of DMX control—while unlocking the full potential of Ridge's precision and versatility.

Through Pathscape software, users can easily create static and dynamic scenes, while scaling up to four universes using DMX, sACN, Art-Net, KiNET, and Pathway ssACN protocols.

With Ridge and Animate Controller, you get a complete, scalable solution for everyday lighting and immersive visual experiences.
